

Healing the Traumatic Core of DSM-IV Diagnoses: 5 Cases, Christian Holism, and the Medical Model (9/12)

Presenter: Charles Zeiders, Psy.D.

This PowerPoint presentation presents 5 fascinating case studies in terms of Christian Holism and the medical model. Cases will explore the clinical healing of trauma from Psychodynamic, Jungian, Behavioral, Cognitive-Behavioral, and Integrative treatment perspectives. Special care will be taken to offer how the clinical expression of Christian spirituality informs the treatment toward a healing conclusion. The little explored variable of client courage will also be explored as a decisive, heroic virtue that clients bring to their experience of healing trauma. The role of replacing dissociative defenses with “resurrection behaviors” will also be strongly emphasized.
