

Project

Diana Pfeiffer, regional coordinator of Region 24, will be composing a reading list for nurses who may be new to the working of the Holy Spirit. This will also address suggestions by nurses requesting more input on the individual gifts of the Holy Spirit. Through the reading list we hope to foster the spiritual life of our members. We especially encourage the reading of the following books that are included in the list; *The History of ACT*, *A Primer for Christian Healthcare Practice*, the books by Francis Mac Nutt and Barbara Shelmon Ryan. .We also encourage reading books which refer to a Christian Perspective on Nursing. One such book is *Spiritual Care: the Nurse's Role* by Judith Allen Shelly and Sharon Fish.

In order to further develop the reading list we are asking nurses for suggestions for books they have read and send their suggestions to Diana dhpfeiffer@juno.com. We would like to add this list to our website.

In addition to our reading list more resources of tapes and articles by Act members are available through Robin Caccese christianhealingresources.org
